

As a human, private citizen, and consumer, I would like to express my opposition to the mandating or inclusion of any "mapping and triangulation" of VOIP hardware or equipment or wireless access points. I would suggest implementing an optional equipment plan whereby consumers can purchase a voip phone or hardware with E911 mapping and/or GPS tracking built in.

I wholeheartedly disagree with and oppose the creation of any FCC rules or any plan to track VOIP calls and users.

Warm Regards,
Paul
